

Oat varieties for the Future Rick Love, Seed Production Coordinator Prairie Oat Growers Association Annual Conference Winnipeg, December 5, 2013

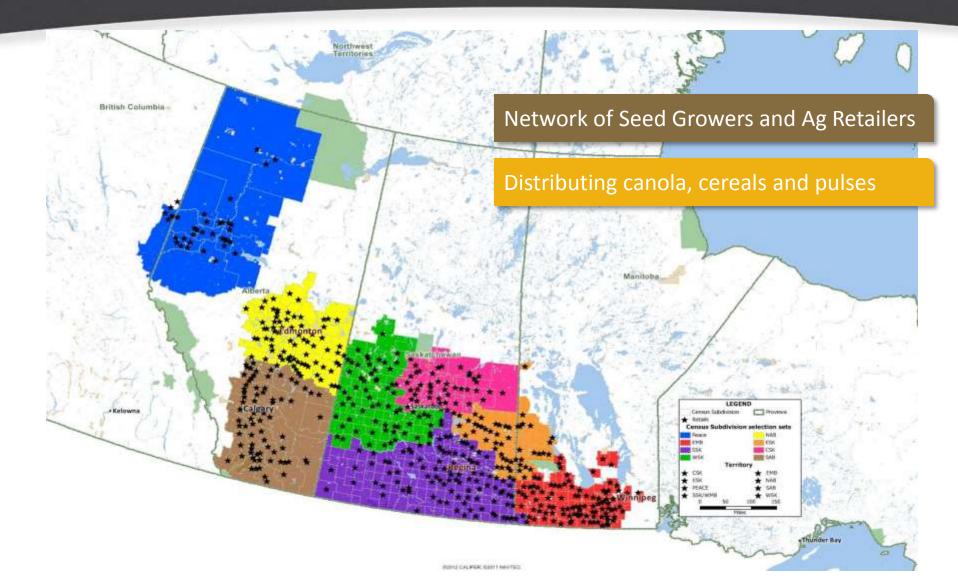

Let's Grow

Overview

- Research & Product Development
- Changing Landscapes
- Oats a special crop?
- Managing Seed Production
- Different Production Models

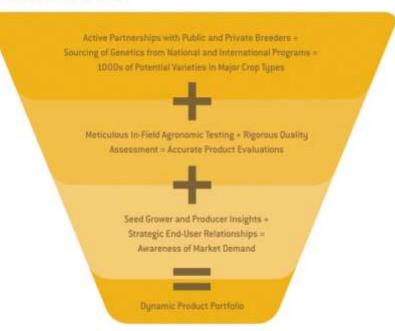

Distribution and Production Network

CANTERRA SEEDS R&PD Program

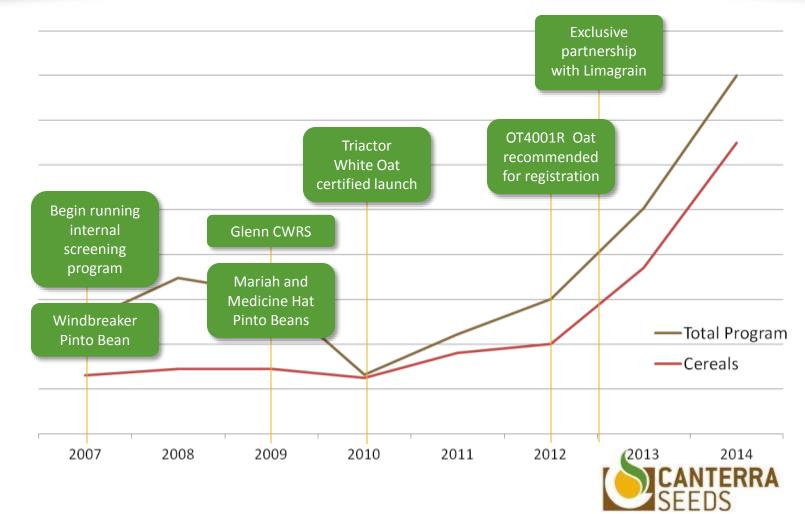

- Relationships with domestic and international breeding partners, both public and private
- Commitment to comprehensive variety development
- Research sites across Western Canada test potential varieties under local agronomic conditions
- Screening based on agronomic performance, disease package, end-use quality
- Strongest varieties promoted to portfolio

PRODUCT PIPELINE

R&PD Program Growth

Plots

Changing Regulatory Landscape

- Act to Reorganize the CWB
 - Commercial landscape changes
- Seeds Act & Regulations
 - Variety registration reviews
- PBR Act & Regulations
 - UPOV '91 ratification imminent?
- Canada Grain Act & Regulations
 - Commercial landscape + variety evaluation support

Changing Development Landscape

Breeding programs

- AAFC reductions
- Private breeding programs
- Producer involvement in breeding?
- Councils & Commissions
 - Barley Council of Canada established 2012
 - Cereals Canada incorporated fall '13
 - Involvement in breeding?

Changes to Variety Registration

- Recommending Committees doing comprehensive reviews of Operating Procedures and criteria for variety registration in response to Letter from Minister Ritz in Feb '13
 - PRCWRT: streamlining Operating Procedures
 - PRCPSC: move to Part III?
 - WCC/RRC: further streamlining?
- Other groups discussing options e.g. CSTA, CropLife, WCWGA, CCC
- AAFC Policy Branch/CFIA/CGC ran 'Crop sector value chain stakeholder engagement'
 - Options presented for comments (comment period closed Nov 30th):
 - Current system
 - Place all crops in Part III, with option to move back to Part I or II
 - Place all crops in Part III, eliminating Parts I & II
 - No government involvement in variety registration

Oats

- Triactor
 - Consistently high yields
 - Approved milling variety
- OT4001R (not yet named)
 - Triactor +++
 - Shorter, stronger straw
 - Greater plumps, less thins
 - Very high beta-glucan
 - Foundation seed available
 - Certified seed launch potential fall 2014
- Next variety?

OT4001R Production

Seed Production Management

- Manage and control Breeder, Select and Foundation stock seed allocations
 - Ownership remains with seed grower shareholders
- All stock seed sales and own-use orders flow through Pedigreed
 Production Coordinator
- Registered seed traded between seed grower shareholders
- Certified sales made via wholesale or retail sales
- Tech fees collected at end of sales season on all transactions
 - Royalties paid to breeder
 - Margin for CANTERRA SEEDS

Production Models

• Open Market Access

- Full release of the variety with no specific restrictions

Closed-Loop IP

- Seed production managed with contracts
- Suitable for trait specific varieties
- Exclusive arrangement with end-user(s)

Production Models

• Open Market Access with IP

- Variety openly available but end-user still choose to IP (ie-Warburton wheat or Canada Malting barley or SaskCan dry beans)
- Seed production contracts or preferred supplier agreements may be used
- Seed Production Contracts
 - Right of first refusal production contracts available
 - Some level of purchase commitment required
 - Some level of grower commitment also required

Toll Production

- Established network of professional seed growers
 - Expertise in seed production, quality management systems, and distribution of various crop types
- Key partnerships with seed industry processors
 - Seed cleaning, treating, packaging, logistics
- Relationships with seed enhancement technology providers
 - Seed treatments, inoculants and various other value added seed enhancements

Toll Production

- Develop joint sales and production targets
- Contract seed production with seed growers
- Regular updates on estimated seed production during growing season
- Centrally controlled quality assurance and processing
- Flexible processes based on commercialization plan
- Management fee based on production or sales volumes
- "Control" or "manage" all aspects of the program to improve the outcome for all stakeholders
